EXPERIENCE

Undergraduate Research project, Márcio Heisecke de Almeida grant *Sept. 2024 - Dec. 2025*
Under Professor [Vítor Possebom](#)'s guidance, I used statistical and econometric methods, executed causal analyses, manipulated big databases, and wrote a scientific article.

EESP Ensina *2024 - present*
Project in which undergraduate students, professors and invited speakers lecture economics to high schoolers. I prepared and gave class on varied economics subjects, ranging from microeconomics to econometrics.

GV Code *Jan. 2023 - Dez. 2024*
GV Code is the club at FGV focus on technology, data analytics, and machine learning. I was a Trainee, Member and Project Director. I was elected member of the semester in all possible occasions. As Project Director, I coordinated 3 projects with teams of 5 people, implemented internally.

Constellation Asset Management, Hackathon *Dezembro 2023*
Using AI models (XGBoost), group used macroeconomic variables to predict the subsequent interest rate (SELIC rate) with low error (less than 0.2 percentage points). The final presentation was praised in a event without prizes.

PROJECTS

Beyond Linearity: Semiparametric Solutions to Contamination Bias with Multi-valued Treatments, with [Vítor Possebom](#)
We extend Goldsmith-Pinkham, Hull and Kolesár (2024)'s Contamination Bias paper with semiparametric estimators. Available at <https://arxiv.org/abs/2609.20473>
